Architecture: one file in, one verdict, four outside tools

Every tool can be switched off: --disable-bandit, --disable-flake8, --disable-pylint, --disable-pyre.

etched:

One run of the checker, top to bottom

margin check by GK

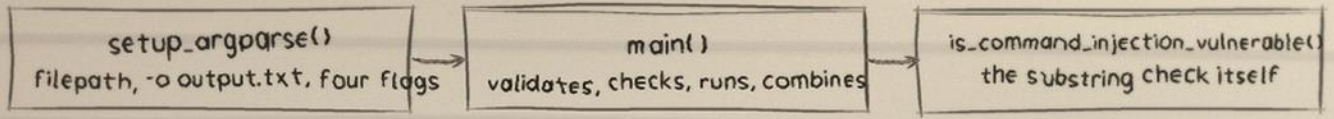

Product map: a first pass over one Python file

WHAT IT IS	WHO IT SERVES	THE BUILT IN CHECK
A checker that reads one Python file and asks one narrow question: could user input reach a shell command?	Me, looking at a script I did not write, before I run it or trust it with anything real.	Plain substring search. Four command spellings, three input spellings, both must appear.

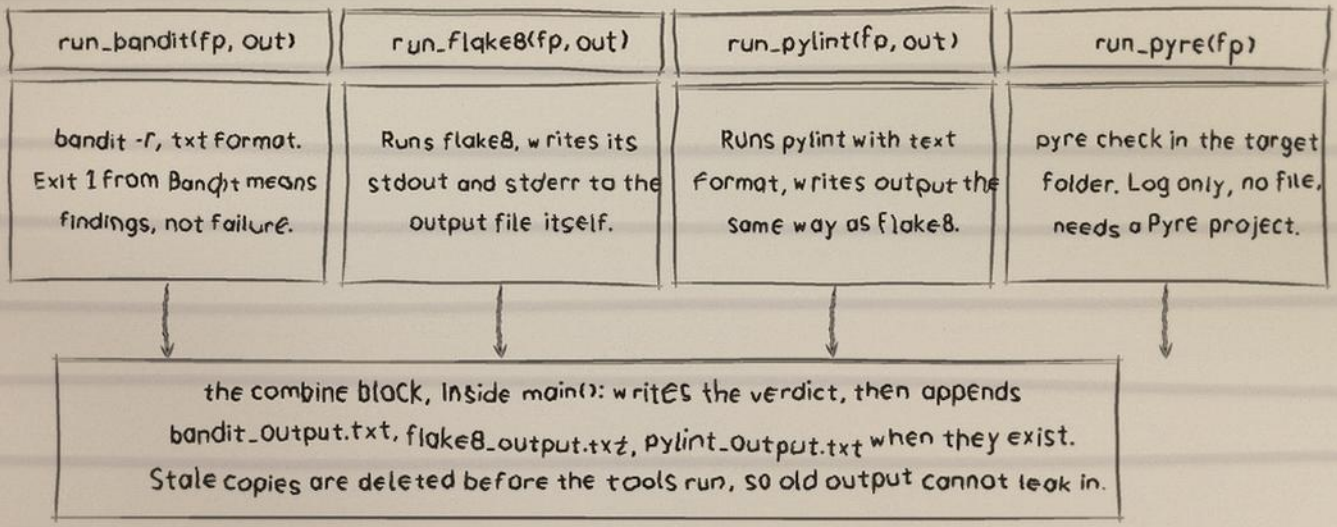

THE OUTSIDE TOOLS	WHAT COMES OUT	WHERE IT STOPS
Bandit for security finds, Flake8 for style, Pylint for analysis, Pyre for types. Each one optional.	A printed verdict and one combined text file: verdict first, then the tool sections that exist.	One file at a time. No data flow, no project scan, no fixes written. It points; it does not repair.

Filed by GK

Components: the seven functions in main.py

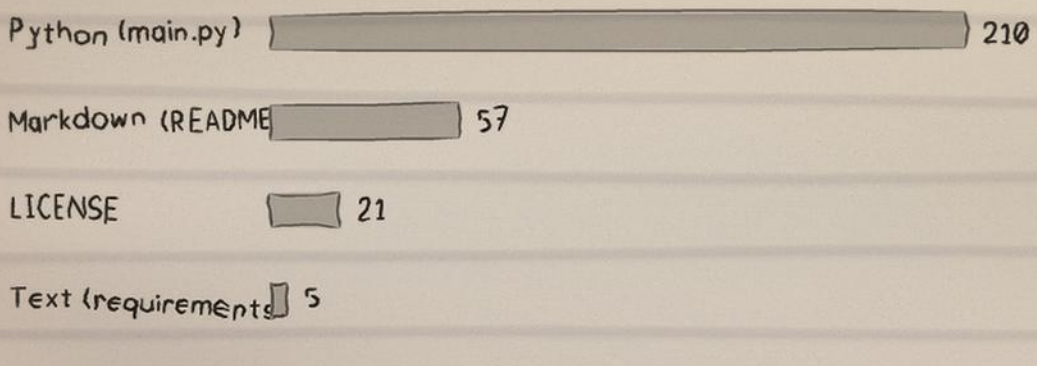

main() then calls each runner the flags leave on:

Shared plumbing: logging at INFO, subprocess.run with captured output, sys.exit(1) on a bad path or a lost results file.

This checker in numbers, counted 2026-10-30

Lines by kind, from git ls-files and a line count over each tracked text file. The two PNG brand images are excluded.

The whole repo is 6 files and 8 commits. First commit 2025-06-01, last one 2026-10-30, both from git log. Tests: none in the repo. I ran the tool itself on a sample file in /tmp instead; the verdict printed as the README says. Full table, with the counting method behind every number, in VISUAL.md in this folder.

Codeintel Os Command Injection Checker: schematic of the apparatus

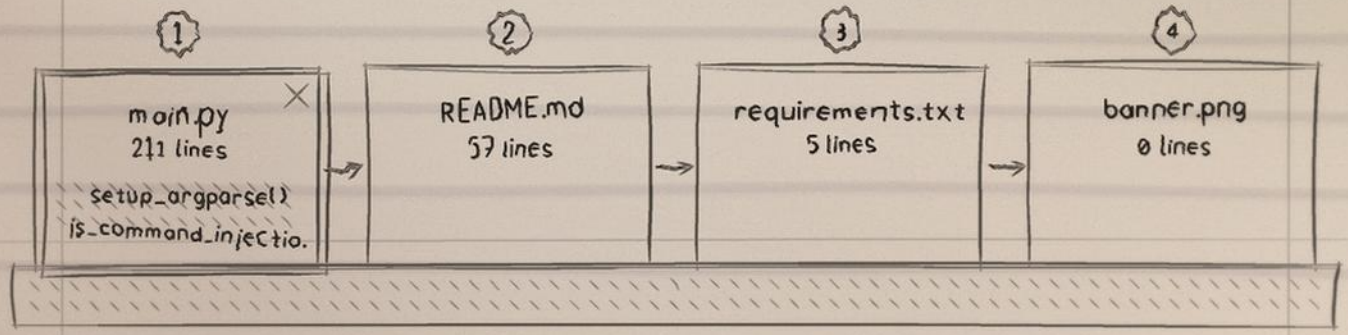

the system as a machine: parts, flow, and measurements

construction lines left in, as drawn

parts list

1. main.py
2. README.md
3. requirements.txt
4. banner.png

in flow order, first to last

base plate: the repo itself, sectioned

span: 5 files, 273 lines counted

turns of the crank so far: 7 commits, 2025-06-01 to 2026-10-30
